Solution Overview

- Financial Modeling**
Ensure accuracy and integrity of spreadsheet formulas.
- Brand Compliance**
Avoid deviation from brand identity.
- Presentation Automation**
Save time and create on-brand presentations.
- Content Management**
Share standardized content and templates across an organization.

About Macabacus

Macabacus helps teams of professionals quickly prepare financial models in Excel by automating complex analyses, formatting, and calculations, while connecting results to PowerPoint and Word documents as changes are being made. It also helps teams comply with investment banking and corporate finance style guidelines in Powerpoint, ensuring presentations are both accurate and professional when engaging with clients or senior management.

Macabacus is used globally by Fortune 500 companies, as well as finance, marketing, and investor relations teams.

Key Features

Macabacus powers productivity and accelerates workflows in high-performing teams and across entire organizations

Some key features include:

- Formula Auditing**
Check the integrity of models using Macabacus' auditing tools, helping deliver error-free analyses to internal and external clients.

- Link to Excel**

Reliably link to Excel data and charts in PowerPoint and Word documents so that spreadsheet changes are seamlessly, efficiently, and accurately reflected in deliverables.

- Presentation Proofing**

Check for errors and inconsistencies related to formatting, layout, and content to ensure flawless presentation quality and brand compliance.

- Shared Libraries**

Improve content standardization and strengthen brand compliance across the organization with shared repositories for digital asset management of reusable content like slides, charts, templates, and images.
